Go to the textbook website (also accessible from the course website on the “Resources” page) and click on the “Interactive Exercises” button on the left. Choose the third link in Chapter 1 (“End-to-end delay”), solve the problem there (or click “Another Problem Like This” to generate a fresh one), and post the answer (including the parameters) to the “jan27exercise” channel on the Slack site.

These solved problems can serve as a review for the entire class.
