Senior Projects in Computer Science

November 2004

Since 1996 I have been the project director (or, in several cases, co-director) of forty senior projects. I have also served as a reader on an additional thirty-one senior projects. Of the projects I have supervised, four have won the Allegheny College Student Chapter of the Association for Computing Machinery’s Outstanding Senior Thesis award: Kim Bailey (1998), Dan Phifer (Dec. 2000), Matthew Pegula (2001), and Tiffany Bennett (2003). Melanie Neff’s project (co-supervised with Mike Keeley) won the College’s 2002 Dieter P. Lotze Award for the best essay exploring the relation of the sciences to other components of the liberal arts education.

Senior Projects Supervised by Robert Roos
