Senior Projects in Computer Science
June 2016

Since 1996 I have been the project director (or, in several cases, co-director) of sixty-nine senior projects. I have also served as a reader on an additional fifty-eight senior projects. Of the projects I have supervised, seven have won the Allegheny College Student Chapter of the Association for Computing Machinery’s Outstanding Senior Thesis award: Kim Bailey (1998), Dan Phifer (Dec. 2000), Matthew Pegula (2001), Tiffany Bennett (2003), David Wagner (2008), Molly Mattis (2012), and Braden Licastro (2014). Melanie Neff’s project (co-supervised with Mike Keeley) won the College’s 2002 Dieter P. Lotze Award for the best essay exploring the relation of the sciences to other components of the liberal arts education.

Senior Projects Supervised by Robert Roos
